Water Discharge

INTRODUCTION OF PRODUCT SERIES

- One machine with multiple functions, dehumidification, purification and direct drinking
- Primary effect filter + HEPA + activated carbon triple air purification
- UVC ultraviolet sterilization function, 99% sterilization rate
- LCD screen, touch operation
- High-efficiency compressor, surging power, stable output, no fear of long-term operation
- PAC composite filter element + UF + rear activated carbon quadruple purification, 0.01 micron
- **10L/day water** speed, suitable for most families and small groups
- Extraction of water from the air to produce water without external water sources

Air water making machine 10L

Water purifier without water source

Air dehumidification, air purification,
UF filtration, ultraviolet sterilization

HuProTec
HUMAN PROTECTION TEC
SWITZERLAND

Without external water sources,
the air water machine extracts the water molecules
contained in the air, After filtration and disinfection
to meet drinking water standards!

Set air dehumidification, air purification,
ultraviolet sterilization,
mineral direct drinking water in one,
to achieve the dual enjoyment of air and water

+

Air Purifier

Remove air pollution

+

air dehumidifier

Keep the air dry

Water Purifier

Mineral direct drinking
water

High efficiency compressor Dehumidification Faster and Quiet

High-efficiency compressor, surging power,
stable output, no fear of long-term operation

Class H11 strainer

Removal of 12 common sources of household pollution

Dander

Dust

Odor

Hair

Pollen

floating wool

dust mites

Aerosol

0.01 micron precision filtration Create peace of mind to drink fresh water

high filtration precision,
Retention of minerals, no waste water

1
PAC composite filter element
Effectively filter sediment, rust, suspended solids, residual chlorine, different color odor, etc.

2
ultrafiltration membrane
The filtration accuracy is 0.01 microns, effectively removing bacteria, Particulate matter, heavy metals and other harmful substances

3
Post activated carbon
Absorb residual chlorine, different color odor, improve taste

Retain beneficial mineral elements

Simulate natural spring water,
filter out sweet and sweet weak alkali mineral water

Benefits of weakly alkaline mineral water

Improved taste
Clear and refreshing

Effectively replenish the
mineral ions needed by
the human body

HuProTec
HUMAN PROTECTION TEC
SWITZERLAND

ultraviolet sterilization Eliminate secondary breeding of bacteria

Built-in over-current germicidal lamp, put an end to the secondary breeding of bacteria, to ensure the safety of drinking water

10L/day water speed

Equivalent to 1 barrels of bottled water
Suitable for most families and small groups

10L

(temperature 30 °C/relative humidity 80%)

LCD Display Touch operation

Temperature, humidity,
filter element replacement reminder
Real-time display of working status

Two installation methods

You can extract water from the air to make water,
Can also be external water source water

Scope of application

Suitable for field camping, hotels, restaurants, ships, parks,
scenic spots, hospitals, construction sites, mines,
offshore drilling platforms,
livestock and poultry farms and other areas

Field Camp

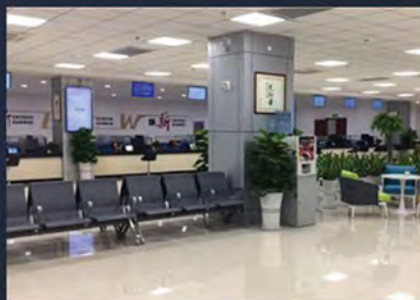

Office drinking water

Kindergarten

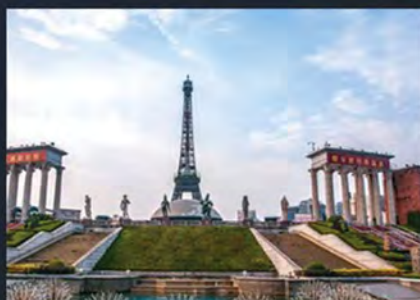

Factory

Bank

Hotel

Scenic spot

Hospital

Product Parameters

Products Name: Air Water Making Machine

Rated voltage/frequency: 220V/50Hz

Water power: 235W

Total power quota: 245W

Water production: 30 °C/relative humidity 80% 10L/day

Potable water tank: 1.2L

Water collection tank: 3.8L

Type of climate: T

Refrigerant/filling quantity: R134a/80g
